PROFILE

General Physics

Teaching:

The successful candidate will lecture in the Physics Department of the Faculty of Sciences of the University of Nice Sophia Antipolis. S/he will lecture general physics in the Bachelor of Physics (Licence) and in the Masters programs of « Physics and Applied Physics » or « Material Physics », or in the trainings of University Côte d'Azur. The successful applicant will also be involved in the activities of the department and the associated teaching programs.

Contact : frederic.hebert@unice.fr

Research:

The successful candidate will bring a strong research expertise to the newly created Institute of Physics of Nice (INΦNI) by either reinforcing an existing research topic or by developing a new research activity within the Institute's strategic interests. Research topics include optics and photonics, soft matter physics, biophysics, quantum optics, mesoscopic physics and theoretical physics. The research activity of the recruited person will promote the development of the institute by giving it a new impetus or by strengthening its themes.
