

## Tenure-Track Opening in Experimental Physics

The physics institute of the *Pontificia Universidad Católica de Valparaíso* is searching for an assistant professor in the area of experimental physics.

Candidates are expected to hold a PhD in physics, have postdoctoral experience, and publications in international peer-reviewed journals. The position requires that the successful candidate perform a mix of research and teaching at both undergraduate and postgraduate level. The probationary period as an assistant professor can extend for up to four years, with satisfactory performance resulting in the offer of permanent academic employment. The salary depends upon the candidate's background and institutional requirements.

Preference will be given to experimental physicists capable of contributing to existing laboratories in the institute <http://fis.ucv.cl/> - especially fluid mechanics and granular material, however high-quality candidates from other areas will be considered, with the committee open to proposals to open a new line of experimental research. In all cases, especially the latter; the viability of the research proposal will be a key variable in the selection process.

Interested candidates should send the following application materials to [german.varas@pucv.cl](mailto:german.varas@pucv.cl) before the 31<sup>st</sup> of December 2017:

- Cover letter and research proposal.
- Curriculum Vitae
- Copy of PhD certificate
- Two recommendation letters

Notification of results: between the 15th and the 19th of January, 2018

Start Date: March 2018
