

Project manager – Analytical Development for Protein Analysis – LYON – France

POSITION TYPE: CDD 8 months

JOB DESCRIPTION: Project manager in analytical development for Protein analysis by mass spectrometry.

ANAQUANT is a private Contract Research Organization (CRO) specialized in Biologics and Biomarkers analysis by Mass spectrometry. ANAQUANT provides high level services and innovative bioanalysis solutions for pharmaceutical and biotech companies.

ANAQUANT is seeking highly-motivated project manager to join its team. You will play a key role in the development of new analytical methods for biomarker validation, bio-therapeutics characterization and quantitation by LC-MS for R&D project in the life science field.

MISSIONS:

As Project manager, reporting to the Operation manager, you will have the responsibility to conduct complex projects from conception to completion in an innovative environment. Experience in working with internal business development team and industrial partners would be an advantage. You will need to demonstrate a self-starting attitude, excellent interpersonal and organizational skills, original thinking and the ability to work to tight deadlines.

- You will define analytical strategies to answer needs of partners for their R&D project
- You evaluate and establish a realistic work timeline in order to run smoothly your project within specified **deadlines**
- You develop new analytical methods (LC-MS)
- You manage the technical relationship and results presentation with our partners
- You are in charge of the **laboratory management** (instrument maintenance, logistic ...) following **GLP and traceability guidelines** (ISO 9001)
- You **work in team** with other project managers on several projects.
- You will be in charge of intern R&D project to develop new technologies and services

EXPERIENCES/SKILLS REQUIRED:

With a Master's or PhD in Analytical Sciences, you have initial industrial experience in analytical development and LC-MS bioanalysis.

Experience in the characterization of biotherapeutic products (intact mass analysis, glycosylation profiling, etc.) would be appreciated. Knowledge of standard protein analysis methods (ELISA, WB, SDS-page, etc.) is an asset.

You are motivated to join an innovative and growing company. You are rigorous and organized, autonomous, and enjoy ambitious challenges. You are able to work in French and English.

If this sounds like you, don't hesitate and apply now. Please send your cover letter, CV and references to:
